For a better society

Protecting health and safety Providing employment Engaging communities and authorities

Adding value for our customers

Geocycle worldwide

Geocycle Egypt

Geocycle Egypt has started its operations in Egypt in late 2010. Geocycle Egypt developed and provided effective solutions in addition to sustainable sources, to facilitate the process of transforming wastes into alternative fuels and raw materials.

In addition, Geocycle Egypt provides world-class solutions to a wide range of customers from wide range of sectors seeking highlyreliable and environmentally– compliant waste management solutions.

Municipal Solid Waste Management

Geocycle Egypt owns and operates 3 Municipal Solid Waste preprocessing facilities across Egypt that serves more than 3 million people every day

Geocycle Egypt pre-processes and transports more than 500,000 tons of Municipal Solid Waste per year from its platforms. Agricultural Waste Management

Geocycle Egypt provides the integrated

solution for farmers and landowners. Highly Agile operational and logistics setup to Collect, Shred and Remove Agricultural Wastes to be disposed in Cement Plants with high Safety measures on sites

> During 2017, AGROSERV solution was provided to more that 12 customers, and processed more than 30,000 tons of Agricultural Waste

Industrial and Commercial Waste Management

Over 40 customers across the country depend on Geocycle Egypt to provide them with reliable and inclusive waste management solutions capable of achieving their corporate sustainability goals.

Geocycle offers wide-range of exclusively certified, recognized and recommended waste management services by the state authorities
